**Amdt date December 7, 2005**  
**Reply to Office action of July 7, 2005**

Claim 14. (Previously Presented) The method of claim 3 further comprising maintaining at least one flag indicating whether the user should receive automatic updates of contact information of a contact of the user.

Claim 15. (Previously Presented) An address contact information system, comprising:  
a server receiving contact information and contact list information for each of a plurality of users;

a mass storage device coupled to the server, the mass storage device storing the contact information and the contact list for each of the plurality of users;

wherein the server is configured to assign an identifier to the contact information of each of the plurality of users;

wherein the server is configured to date stamp the contact information of each of the plurality of users;

wherein the server is configured to determine whether contact information of a specific user is synchronized with contact list information of another specific user; and

wherein the server is configured to provide contact information of a specific user to at least some individuals indicated in contact list information for the specific user when the contact information for the specific user changes.

Claim 16. (Previously Presented) The address contact information system of claim 15 further comprising:

a plurality of address clients, the address clients in communication with the server over the Internet, each of the address clients receiving contact information from the server, at least some of the address clients comprising a handheld computer.
